

**Create a simple cloud software application for Property Buying & Rental process
(In Chennai city) using any Cloud Service Provider to demonstrate SaaS**

AIM:

To develop a Property Management System using Zoho Creator for managing property details, owners, tenants, and rental information efficiently.

ALGORITHM:

- Log in to the Zoho Creator account.
- Create a new application named Property Management System.
- Design forms to store property, owner, and tenant details.
- Add appropriate fields such as property ID, address, owner name, and rent amount.
- Configure field validations to ensure accurate data entry.
- Create reports to display and search property records.
- Develop workflows for automatic calculations or notifications.
- Test the application by adding sample property records.
- Verify that data is stored and retrieved correctly.
- Save, publish, and test the application for proper functionality.

IMPLEMENTATION:

```

1  if(input.Chennai_Area == "Anna Nagar")
2  {
3      Price_per_Sq_ft = 12000;
4  }
5  else if(input.Chennai_Area == "T Nagar")
6  {
7      Price_per_Sq_ft = 15000;
8  }
9  else if(input.Chennai_Area == "Velachery")
10 {
11     Price_per_Sq_ft = 9000;
12 }
13 else if(input.Chennai_Area == "Tambaram")
