

Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS

AIM:

To develop a cloud-based Library Book Reservation System using Zoho Creator for managing book reservations and to demonstrate the Software as a Service (SaaS) cloud computing model.

ALGORITHM:

1. Log in to the Zoho Creator cloud platform using a valid account.
2. Create a new application named SIMATS Library Book Reservation System.
3. Design a form to collect student and book reservation details.
4. Add fields such as Student Name, Register Number, Department, Book Title, Author, Reservation Date, Return Date, Available Copies, and Status.
5. Configure drop-down lists for Department, Book Title, and Reservation Status.
6. Create a report to display all reservation records.
7. Add a workflow to validate the availability of books before accepting a reservation.
8. Configure the workflow to automatically set the reservation status after successful submission.
9. Test the application by entering sample reservation details and verify that records are stored correctly.
10. Publish the application and access it through a web browser to demonstrate the SaaS model.

IMPLEMENTATION:

```
1  if(input.Available_Copies <= 0)
2  {
3      alert "Book is currently unavailable.";
4      cancel submit;
5  }
6
```

```
1 input.Status = "Reserved";
2
```

OUTPUT:

LIBRARY BOOK MANAGEMENT SYSTEM:

SIMATS Library Book Reservation System

Student Name	
Register Number	
Department	-Select-
Book Title	-Select-
Author	
Reservation Date	dd-MMM-yyyy
Return Date	dd-MMM-yyyy
Available Copies	#####
Status	-Select-

REPORT:

SIMATS Library Book Reservation System Report									
Reservation ID	Student Name	Register Number	Department	Book Title	Author	Reservation Date	Return Date	Available Copies	Status
2	SAI	1234232	ADS	Cloud Computing	RAFI	03-Aug-2024	07-Aug-2024	5	Reserved
1	Rahul	72321001	CSE	Cloud Computing	Rajkumar Bhoys	03-Aug-2024	05-Aug-2024	5	Reserved

RESULT:

A simple SIMATS Library Book Reservation System was created using Zoho Creator. The application allows users to reserve books online and demonstrates the Software as a Service (SaaS) cloud model.
